ABOUT ME

Dedicated **Software Developer** with over a year of experience, passionate about driving innovation and optimizing business processes. My focus is on understanding company needs to deliver customized technological solutions that propel growth and success. I have a *curious mind, and a great passion and capacity to learn*. I'm interested in understanding the behavior of everything, to accomplish better results.

EXPERIENCE

Full Stack Web Developer at BIGGER August 2024 -

Present

Main tasks:

- Design and development of RESTful APIs, implementation of complex business logic, and database management using TypeORM. I ensure the security and scalability of applications by implementing authentication and authorization strategies.
- Creation of interactive and responsive user interfaces using React and Next.js, optimizing user experience and performance through advanced loading and resource optimization techniques.
- Use of SuperTest for API integration Testing. Cypress to E2E Testing and Jest for unit testing. I Implemented CI/CD pipelines to ensure code quality and continuous delivery.
- Work closely with cross-functional teams to identify requirements, design solutions, and ensure project delivery within established timelines. Actively participate in code reviews and contribute to continuous improvement of the development process.

Mobile Developer at Kiura June 2023 - June 2024

Main tasks:

- Designed, developed and tested mobile applications for IOS and Android platforms using **React Native** increasing mobile user base by 30%.
- Implemented features such as push notifications, real-time updates, and offline functionality, resulting in a 25% boost in user engagement and a 20% increase in app retention rate.
- Collaborated with UX/UI designers to create intuitive and visually appealing mobile interfaces.
- Optimized Front-end performance by implementing best practices in state management with **Redux**, lazy loading and code splitting.
- Implemented authentication and authorization mechanisms to secure applications and protect user data.

TECH SKILLS

Back-End Development: *API Rest - Nest.js - Node.js - Express - MongoDB - PrismaDB - PostgreSQL - TypeORM - Sequelize - Docker - AWS.*

Front-End Development: *React - TailwindCSS - React Native - Next.js - Redux & Toolkit - HTML - CSS - Vite - React Query.*

Languages & Tools: *JavaScript - Typescript - Unit Testing - Jest - Cypress - Git & GitHub - Agile Methodologies - Scrum.*

SOFT SKILLS

Effective time management

Fast Learner

Teamwork and Problem Solving

Adaptability
